

Physics 1

2017-09-12

Agenda

- office hours & tutoring.
- problem sets & worksheets.
- Thrown Stone.
- (Assumptions)

Kinematics

release

velocity
 ms^{-1}

history of
all positions

A

B

\vec{a}

Assume:

- \vec{a} const.
- only gravity
- no air resistance

- guess
- discuss
- assume?
- solve
- check.

water.

velocity @ A

velocity @ B

times a scalar
vector

$$\vec{V}_B = \vec{V}_A + \Delta \vec{V}$$

$$\Delta \vec{V} = \vec{a} \Delta t_{AB}$$

\downarrow \downarrow \downarrow
 $m s^{-1}$ $m s^{-2}$ s

$$\vec{v}(t) = \vec{v}_0 + \vec{a}t$$

$$\vec{v}(t=0) = \vec{v}_0$$

$$\vec{x}(t) = \vec{x}_0 + \vec{v}_0 t + \frac{1}{2} \vec{a} t^2$$

(
parabola

$\vec{x} \cdot \hat{u}$
